OPENING REMARKS

BENJAMIN QUINLAN

Chairman

FinTech Association of Hong Kong

FINTECH ASSOCIATION
OF HONG KONG

Powering Hong Kong's FinTech Community

Our Association

The FinTech Association of Hong Kong (FTAHK) is a not-for-profit organization led by a volunteer group of board members and committee co-chairs who care about the future of FinTech in Hong Kong, Mainland China and Asia.

The value of FTAHK will be generated through collaboration with the public sector, corporates and startups which are then filtered through the expertise of our 8 committees. As such, our organization encompasses the whole taxonomy of FinTech.

Our Mission

We aim to enrich Hong Kong's Fintech ecosystem through our three pillars of advocacy, collaboration and education.

Advocate for the development of proportionate and effective regulation while attracting greater investment and talent into Hong Kong FinTech.

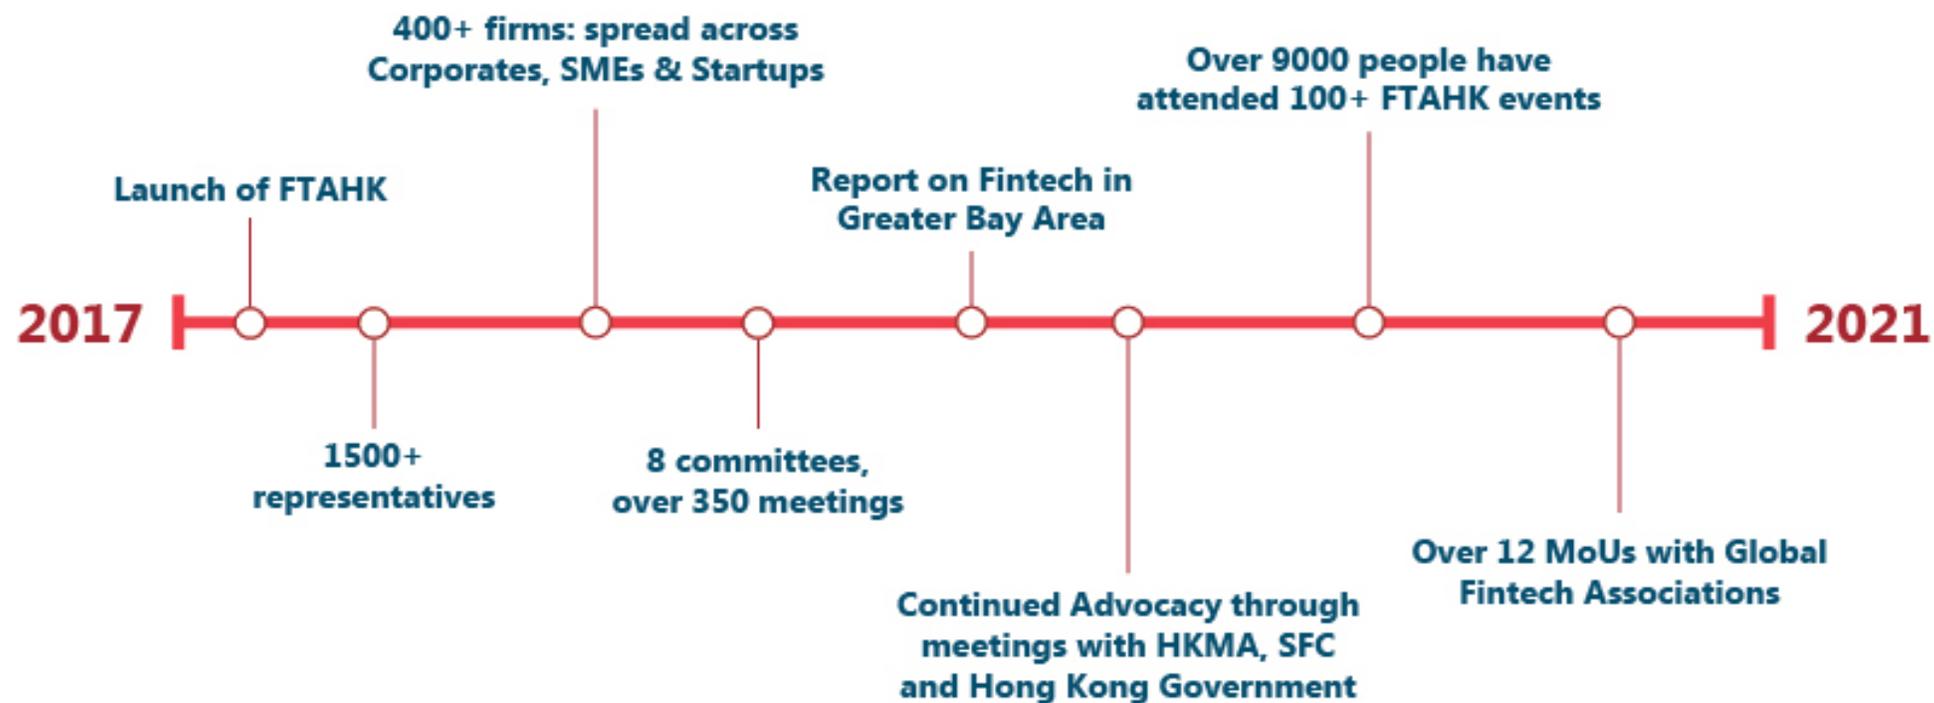

Collaborate - Identify symbiotic partnership opportunities to collaborate with organisations who share similar goals and/or complementary business models.

Educate - Leverage extensive workshop and training opportunities led by industry experts to drive education and development opportunities.

Milestones

Our 8 Committees

The value of the Association will be generated through the work and activities from our Committees. We are focused on clear outcomes and actions. Encompassing the whole taxonomy of Fintech :

NEW CFA INSTITUTE LEARNING MODULES FOR MEMBERS

Dive into Data Science with New Online Learning Modules

Our members revisit our Refresher Readings every year to help them adapt to industry changes. To keep pace with these changes, we adapted the content from two Refresher Readings—material we typically offer in PDF and ePub formats—into interactive, online modules that accommodate your learning preferences. Set your own date for completing the module, see how you rank against other participants, check your mastery as you progress, and earn Professional Learning credit, at the times and places most convenient for you.

Log in using your member credentials to explore the modules. We welcome your feedback as we build and improve upon this new learning experience.

Machine Learning

Dive deeper into machine learning, neural networks, deep learning nets, and more. This PL-eligible Refresher Reading and flexible, modular learning opportunity will expand your knowledge of machine learning terminology and processes.

[Access the Content >](#)

Organizing, Visualizing, and Describing Data

Explore new ways to turn data into keen financial analysis with this Refresher Reading and online learning module. Flexible lessons update you on data types and data visualization methods as you earn PL credits.
